875-81 Massachusetts Ave.

Cambridge, MA 02139

Tel. 617-354-7875

Fax 617-354-6875

C.E.O.: J. Charles Germain

Asst.: John Xanco

History and Mission

Gauthier-Villars was founded in 1792. Through its history, it has published the most important names in mathematics such as Henri Cartan, Henri Poincare, Albert Einstein and Jean Dieudonne. The company was acquired by Bordas in 1974 and joined Le Groupe de la Cite in 1987.

Le Groupe de la Cite is a large European publishing house in Paris with the following subsidiaries: Nathan, Larousse, Les Presses de la Cite, Dalloz, Bordas, Dunod, Gauthier-Villars and others.

The opening of Gauthier-Villars North America in Cambridge, Massachusetts is part of a strategy of expansion in the international market. In order to ensure the timeliness and quality of publishing at the most competitive prices, Gauthier-Villars will remain independent from the large scientific publishing houses.

The Journals

Publisher of the *Comptes Rendus de l'Academie des Sciences* and the *Journal de Mathematiques Pures et Appliquees* since 1836, Gauthier-Villars has been by tradition a publisher in mathematics and in sciences. Recent developments have positioned Gauthier-Villars in the fields of chemistry and life sciences as well.

For 1991 a new journal will be created in association with the European Association of Agronomy. Two new journals will be published in oceanography and another in ecology.

In order to cooperate with the global scientific community, Gauthier-Villars has begun to publish more and more articles in English and to restructure the domestic journals. Today 90% of the journals are in English with the help of associated editors from Europe and North America.

All of the journals are indexed in publications such as *Current Contents*, *Mathematical Reviews*, *Zentralblatt fur Mathematika*, *Inspec*, *Pascal Database*, *Chemical Abstracts*, or *Biosis*.
